DELVING INTO DETAILS IS A JOURNEY OF INTIMACY

Introducing our DMInteract DM-UF5 an advanced water purifier system that guarantees a worry-free experience and exceptional performance. With a focus on precision and innovation, we present a solution that elevates your water quality to unmatched levels.

Say goodbye to the concerns of leakage, as our design ensures a secure and reliable system that keeps your surroundings dry. With an impressive throughput of 400L/H, you'll have access to an abundance of purified water, catering to your needs without compromise.

Experience a new level of confidence with our enhanced bacteria removal technology, providing an even higher level of assurance in the purity of your water. The tankless design not only ensures space-saving elegance but also offers easy installation, granting you peace of mind without the hassle.

High throughput
400L/H

Remove bacteria
More assured

Tankless design
save space

Easy installation
Peace of mind

Remove residual
chlorine

Our water purifier is designed to tackle various impurities effectively. Thanks to the high-density activated carbon, derived from natural materials with potent adsorption capabilities, it efficiently eliminates residual chlorine, chemical pesticides, and unwanted odors, leaving your water fresh and pleasant to drink. The addition of the PPF filter element with a precision of 5um ensures the removal of solid impurities like sediment, rust, and suspended particles from the raw water, offering a comprehensive filtration process.

The UF ultrafiltration membrane filter takes things a step further, safeguarding your health by filtering out harmful substances while retaining essential minerals that contribute to your well-being. This filter operates within a pressure range of 0.1-0.4Mpa and offers an astonishing filtration accuracy of 0.01um, ensuring that even the tiniest contaminants are effectively removed. And with an operating temperature range of 5-38 degrees Celsius, your purified water remains consistently refreshing.

Elevate your water quality and elevate your life with our advanced water purifier system – a testament to precision, efficiency, and innovation.

HIGH DENSITY ACTIVATED CARBON

Natural materials with strong adsorption capacity

Efficiently adsorbs residual chlorine in water, chemical pesticides, odors and odors, and filters fine impurities

PREFERRED PP FILTER ELEMENT

Filtration accuracy 5um rough filtration of raw water

Filters solid impurities such as sediment, impurities, rust, suspended solids in water

UF ULTRAFILTRATION MEMBRANE FILTER:

Filter out harmful substance, retain beneficial minerals

PRODUCT PARAMETERS:

Product Model:	DM-U5
Pure Water Flow:	150L/H
Working Pressure:	0.1-0.4Mpa
Filtration Accuracy:	0.01um
Operating Temperature:	5-38 °C
